Subject: HB 4425. & HB 4426

Hello Joy,

I am asking for your support in the following bills:

HB 4425
HB 4426

My children are 11 years old, 3 and 1. They have never been vaccinated and have never been sick. Last year we were required to attend a "re-education" session at the Department of Human Services to obtain a waiver for our oldest to attend Jr. High. It was anything but educational as it was one-sided and not objective. My husband and I opt out of allowing vaccination administration for many different reasons and this is the choice we have made for our children. I believe it is the parent's choice for their children. Not the state. Please support our freedom.

Secondly, I do not think that my child should have to be taken out of school if another child gets ill. If the other children in school are vaccinated then my healthy child won't cause them to be ill...isn't that what they're taught? That vaccines prevent diseases? If so, my healthy child is not putting anyone at risk.

Thank you for your time!
